Key points

- The Headphones are fitted with two 3.5mm jack plugs pre coloured to match and help identify the sockets on a PC or computer (Pink socket/plug for the analog microphone, and the Green plug/socket is for the stereo line level audio output for headphones).
- Powerful but perfect crystal clear sound, efficient crisp response across the audible frequency, the acoustic tuning allows you to truly experience full frequency of sound with ample loudness without distortion but with a satisfying Bass. They provide very accurate audio reproduction for a rich, clear and dynamic sound only to be replicated in very expensive Hi-Fi sets.
- Lightweight comfortable sturdy headphone design, the closed cup design and soft cushioned ear pads are angled to gently follow the contour of your ears so that they don't 'bleed' sound to distract adjacent people and minimise background distractions.
- An adjustable, cushioned headband distributes weight evenly across the top of your head. Together, with the ear pads they help provide hours of continuous & comfortable listening.
- This model is provide with a coiled lead this assists keeping the cable tangle free, this will allow easy unrestricted movement at the desk.
- The microphone is mounted off the ear piece by a flexible but stay-put mount, this allows poisoning of the microphone adjustable and comfortable for the personal choice of the user. The quality an range of pick up is impressive. It allows the headset to be used with language software, voice recognition software, gaming and skype, etc.
